EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

NOTE: The following amendment and proposed drawing changes do not require separate Applicant authorization, since Applicant had previously provided approval by submitting 1) mark-up copy amendment to the specification requesting the changes listed below but failed to provide a clean copy; 2) twice drawing changes requesting the changes as proposed and approved by examiner below but in improper form by altering the figures and introducing new matter.

The application has been amended as follows:

In the specification:

- 1) On page 9: line 28, insert --62-- after "switch"; line 29, insert --64-- after "circuit".
- 2) On page 10: line 1, insert --62-- after "switch".

Drawings

2. The following changes to the drawings have been approved by the examiner: 1) In Fig. 1, the labels "62" and "64" have been attached to the unlabeled box situated between 30 and 34; 2) In Fig. 3, label "36" has been changed to --30--. See Attachment. Note that **all drawings and changes** have to be based on the original figures filed 8/22/03 as opposed to Applicant's later filed drawings which looked different from the original figures and thus containing new matter (i.e. Figs. 1-2). Only new drawing sheets containing amended figures 1 and 3 need be submitted,

Art Unit: 2632

in which figure 2 contained on the same sheet with figure 3 should remain unaltered as was originally filed on 8/22/03. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

3. The following is an examiner's statement of reasons for allowance:

In a parking aid that provides indication to help a user park a vehicle properly in a garage having a garage door, door opener and obstacle detecting light transmitter-receiver circuit connected to a safety circuit, the claimed use of the light transmitter-receiver circuit to detect and indicate the detected position of the vehicle body in the manner claimed, thereby eliminated use of separate detection components, is not taught or suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin C. Lee whose telephone number is (571) 272-2963. The examiner can normally be reached on Mon -Fri 11:00Am-7:30Pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Wu can be reached on (571) 272-2964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
